E' PIU' IMPORTANTE

IMPARARE

○

PARLARE

L'INGLESE ?

Gli studenti italiani **STUDIANO** la lingua
inglese in media 10 anni ...eppure al
termine del percorso scolastico non lo
PARLANO !!!

Dopo 2 settimane ricordiamo

**Un metodo didattico che si incentra
esclusivamente sul COINVOLGIMENTO
degli studenti**

What is GESE?

- ▶ An English language examination which assesses speaking and listening – helping you communicate in real English
- ▶ There are 12 grades mapped to the CEFR
- ▶ A one-to-one, face-to-face oral examination with a native English-speaking Trinity examiner who travels from the UK

Who is the examination for?

- ▶ Anyone from absolute beginners to advanced-level language users
- ▶ School children to adult learners who wish to improve their spoken English skills – for study, for work or for life

Key features

- ▶ **Practical:** emphasises the practical use of language, rather than testing theoretical knowledge
- ▶ **Inclusive:** a grade for every individual learner whatever your ability in communicating in English
- ▶ **Compatible:** easy to transfer to ISE when proof of reading and writing skills is required
- ▶ **Personal:** the exams are candidate-led and based on your own experience
- ▶ **Motivational:** tests what you can do – not what you can't
- ▶ **Convenient:** designed to support classroom work, not interfere with it, forming a natural part of communicative English language study
- ▶ **Responsive:** provisional results available to you straight after the exam session

Task details

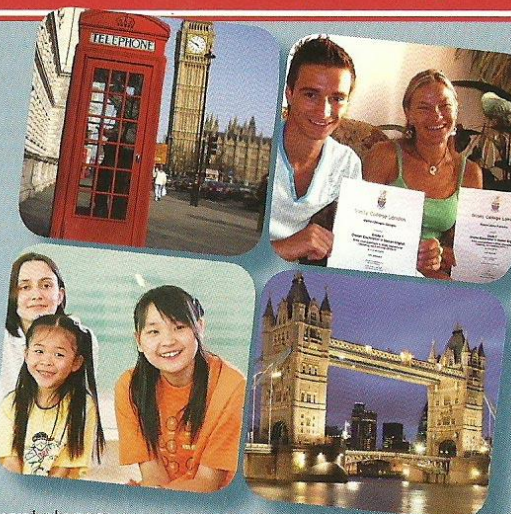

- ▶ **Conversation:** A realistic exchange of information, ideas and opinions.
- ▶ **The Topic:** Before exam day, you will prepare a topic of your choice which is then used as a basis for discussion with the examiner during the examination.
- ▶ **The Interactive task:** An initial prompt from the examiner gives rise to an interactive conversation which you must be able to maintain.
- ▶ **The Listening task:** Three short passages are read aloud and you must then respond appropriately by using skills of prediction, deduction and inference.
